Work Experience

OutMatch Associates Inc.
Junior Web Developer
May 2017 – March 2018

OutMatch manages a network of sites with over ten million monthly visitors.

- Report to the senior developer or CTO and assist in building various pages, site components, and subscription forms

- Develop an AMP (Accelerated Mobile Pages) theme that reflects the current design and complies with industry standards

- Collaborate with the in house graphic designer to create a Shopify and UltraCart store front theme

- Research and test various types of WordPress plugins to be used on the websites

Freelance
Front-End Web Developer
Since January 2014

- Conceptualize and brainstorm ideas for the websites layout and functionality

- Design custom WordPress themes using the Underscores starter theme

- Write and debug HTML, PHP, CSS, and JavaScript for loading content, making pages responsive on different devices and web browsers

- Include meta tags and HTML5 formatting for better site optimization on search engines and social networks

- Create animations using CSS3 or GSAP to add visual interest and enhance the web page

- Scan, edit, and compress images for a faster user experience

- Setup localhost environment for projects, register and direct web domains to hosting servers, create MySQL databases, add user authorization
